Profile Summary

Fourth-year B.Tech CSE student at MLR Institute of Technology with hands-on experience in React, Python (OpenCV, TensorFlow), and MERN stack. Built 6 end-to-end projects spanning AI, computer vision, and full-stack web development. Seeking a developer internship or entry-level role.

Education

B.Tech – Computer Science and Engineering 2023 – 2027 (Expected)

MLR Institute of Technology, Hyderabad | CGPA: 7.6 / 10

Intermediate (MPC) – Class XII 2021 – 2023

Narayana Junior College | Percentage: 78.2%

Secondary School Certificate (SSC) – Class X 2020 – 2021

Dr. K.K.R. Gowtham Concept School | GPA: 10.0 / 10

Technical Skills

Languages: Java, Python, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, OpenCV, TensorFlow

Tools: Git, GitHub, MySQL, Arduino, VS Code

AITools: Claude, Cursor, Windsurf, Kiro, GitHub Copilot

Interests: Full-Stack Web Dev, Computer Vision, Machine Learning

Projects

Sportsync – Sports Facility Booking MERN Stack

<https://sportsync-d644b.web.app/>

Full-stack booking platform with JWT auth, real-time slot availability, and a responsive UI built with MongoDB, Express, React, and Node.js.

Virtual Drug Discovery with QML React.js, Vite

<https://virtual-drug-discovery.web.app/>

Applied Quantum Machine Learning to predict effective drug compounds; built an interactive React+Vite frontend to visualise model confidence scores.

Edupath-AI – Personalised Learning Companion (In Progress) React.js

Built an adaptive learning platform that recommends personalised study resources based on student progress, using React hooks and reusable components.

Drowsiness Detection System Python, OpenCV

Real-time driver alert system using Haar cascade classifiers to detect eye-blink patterns; triggers an alarm within 1–2 seconds of prolonged eye closure.

ATS Resume Scanner Python, TensorFlow

NLP-based tool that matches candidate resumes to job descriptions using TensorFlow; automates keyword extraction and candidate ranking.

Weather Report App HTML, CSS, JavaScript

Responsive app fetching real-time weather via public API with dynamic UI updates and city-level forecasts.

Key Strengths

Fast Learner: Independently picked up Quantum ML and OpenCV for project work.

Team Leader: Coordinated cross-functional project teams to deliver on time.

Full-Stack Versatility: Comfortable across frontend (React), backend (Node/Express), and AI/ML (Python).

Effective Communicator: Explains technical work clearly to both technical and non-technical audiences.
